

Endangered Resources Preliminary Assessment

Created on **2/21/2020**. This report is good for one year after the created date.

Results

A search was conducted of the NHI Portal within a 1-mile buffer (for terrestrial and wetland species) and a 2-mile buffer (for aquatic species) of the project area. Based on these search results, below are your follow-up actions.

Further actions are strongly recommended. One or more of the following situations apply **and the species or record overlaps the project site**:

- The species recorded are special concern.
- The records are from natural communities or other natural features.
- The species recorded are threatened or endangered plants, but are not protected due to the project occurring on private land or due to another type of exemption (i.e. agriculture, utility, etc.).

You are **strongly** encouraged to request a full ER Review, although it is not required. If an Endangered Resources Review is requested for this project, it would provide recommended (voluntary) actions that could be taken during the course of the project. The preliminary assessment can be submitted with DNR permit applications and requests to demonstrate compliance with the Endangered Resources Review Process.

A copy of this document can be kept on file and submitted with any other necessary DNR permit applications to show that the need for an ER Review has been met. This notice only addresses endangered resources issues. This notice does not constitute DNR authorization of the proposed project and does not exempt the project from securing necessary permits and approvals from the DNR and/or other permitting authorities.

Project Information

Landowner name	City of Stoughton
Project address	S. Fourth Street, Stoughton, WI Township & Range: T05NR11E, Section: 08, Quarter & Quarter: SW of the NE
Project description	Dam abandonment and removal
