

## **Proof of Ownership**

Enbridge is negotiating with landowners along the Project route to acquire the temporary and permanent easements needed for construction, operation, and maintenance of the Project. Enbridge has not yet acquired all the necessary easement rights from the landowners; however, Enbridge will continue to negotiate in good faith and will update the respective agencies regularly as agreements are reached. Pursuant to Wis. Stat. § 32.02(13), Wis. Admin. Code § PSC 2.07, and any other rule or law deemed applicable by the Public Service Commission, Enbridge has also submitted a Public Interest Determination Application to the Public Service Commission seeking a determination that the Project is in the public interest. This would allow Enbridge to acquire, by condemnation, permanent and temporary easements and additional temporary workspace, should it be necessary.
