Re: IP-SC-2024-13-00581 and IP-SC-2024-13-00582 and IP-SC-2024-13-00583, Epic Systems Corporation

Dear Ms. Von Holdt,

This letter addresses an anticipated conflict between DNR statutory requirements and updates to the permit application.

Epic understands that the statute governing DNR's permit review process denotes a permit decision is to be rendered and issued within 30 days after the public comment period ends. The comment period ended on May 19th, 2024. Per the statute, the DNR state's permit decision is due by June 20th (not counting holidays).

In response to comments generated during the public comment period, Epic has identified several revisions and updates that will be made to the permit application. The changes cannot reasonably be prepared and re-submitted with sufficient time for DNR review within the current 30-day window.

Therefore, Epic agrees that the DNR may extend the review timeline by an additional 30 days. It is Epic's understanding this allowance modifies the statutory deadline to July 20th, 2024.

Sincerely,

Epic

James S Schumacher
Senior Director of Facilities
