**Re: WDNR Water Resources Application for Project Permits
Line 5 Wisconsin Segment Relocation Project
WDNR Docket Number IP-NO-2020-2-N00471
Project Updates**

Dear Ben:

Thank you for your and the Wisconsin Department of Natural Resources' ("WDNR") work in preparing an Environmental Impact Statement ("EIS") for Enbridge's proposed Line 5 Wisconsin Segment Relocation Project ("Project"). This letter provides minor updates to tables and mapping submitted to the agency as part of Enbridge's application materials for environmental permits associated with the Project. These minor revisions include an alignment adjustment to the Highway 13 Horizontal Directional Drill ("HDD"), as well as the addition of three mainline block valves. Additional geotechnical information associated with Enbridge's planning for the proposed HDDs and direct pipe crossing of select waterbodies is also included.

If you have questions about the information presented in the attached materials, please contact me at (218) 390-9254.

Sincerely,

Julie Kloss Molina
